

SHAGUN INDUSTRIES WEBSITE

PART 1 — LOOK & DESIGN

DESIGN GOAL

The website should look:

Professional • Premium • Modern • Industrial • Trustworthy

Use the same design language on every page.

HEADER / NAVIGATION

Recommended order

Logo → Home → About → Products → Industries → Projects → Careers → Contact → GET A QUOTE

Changes

- Keep header clean.
 - Make **GET A QUOTE** the main highlighted button.
 - Header can stay sticky while scrolling.
 - Use a hamburger menu on mobile.
 - Keep logo size balanced.
-

HOME PAGE ORDER

Use this order:

01. Hero

02. About / Company Introduction

03. Products

04. Why Choose Us

05. Industries We Serve

06. Manufacturing Process

07. Projects / Our Work

08. Quality & Certifications

09. Testimonials

10. Careers / Join Our Team

11. Get a Quote / Contact

12. Footer

This creates a clear journey:

Understand → Explore → Trust → Work With Us → Contact

COLOR SYSTEM

Use your company colors consistently:

● **Navy Blue** — #0B3D91

● **Orange** — #F58220

● **White**

■ **Light Grey**

Recommended use

Navy Blue → Header, headings, important sections

Orange → Main buttons, highlights, icons, important information

White → Main backgrounds

Light Grey → Alternate sections and cards

✗ Don't introduce many additional colors.

4 FONT

Best choice:

Inter

Alternative: **Poppins**

Font hierarchy

H1 → Bold

H2 → Semi-Bold

H3 → Medium/Semi-Bold

Body → Regular

Buttons → Medium/Semi-Bold

Use the same font throughout the website.

5 BUTTON STYLE

Primary button

- Enquire Now
- Apply Now
- Contact Us

Button design

- 6–10px rounded corners
 - Comfortable padding
 - Clear text
 - Subtle hover animation
 - Consistent size
-

6 ✨ ANIMATION / EFFECTS

Use **subtle professional effects**.

Good effects

- ✓ Fade-in
- ✓ Slide-up
- ✓ Card hover
- ✓ Image zoom on hover
- ✓ Button hover
- ✓ Smooth scrolling
- ✓ Number counters

Example:

10+ Years Experience
500+ Panels Manufactured
100+ Projects

Numbers can animate when the section becomes visible.

Avoid

- ✗ Flashing
- ✗ Excessive bouncing
- ✗ Too much parallax
- ✗ Continuous moving objects
- ✗ Long page transitions

The website is industrial, so it should feel **professional—not like a gaming website**.

7 🎨 PRODUCT CARDS

Each product card:

📷 Product Image

Product Name

Short description

View Details →

Hover

- Slight card lift
- Small image zoom
- Soft shadow
- Arrow movement

Keep all cards consistent.

8 ICONS

Use one consistent icon style.

Examples:

-  Electrical
-  Manufacturing
-  Automation
-  Quality
-  Delivery
-  Service

Don't mix many different icon styles.

9 IMAGE DESIGN

Prefer **real Shagun Industries photos**.

Make images:

- ✓ High quality
- ✓ Same aspect ratio
- ✓ Properly cropped
- ✓ Correctly compressed
- ✓ Not stretched
- ✓ Not blurry

Use a consistent style for product photographs.

10

MOBILE DESIGN

Check every page on mobile.

Make sure:

- ☒ Text is readable
- ☒ Buttons are easy to press
- ☒ Images fit correctly
- ☒ Cards don't overflow
- ☒ Menu works
- ☒ Forms work
- ☒ No horizontal scrolling

Add floating:

WhatsApp

Optionally:

Call

11

SPACING

Keep consistent:

- Section padding
- Card spacing
- Heading margins
- Paragraph spacing
- Button spacing

Don't make the page crowded.

12

CAREERS / INTERNSHIP DESIGN

Create a professional **Careers** page.

Recommended structure:

JOIN SHAGUN INDUSTRIES

Build Your Career With Us

Then show two clear options:

JOB OPPORTUNITIES

Explore career opportunities at Shagun Industries.

 **View Jobs**

INTERNSHIP PROGRAM

 **Explore Internship**

Use attractive professional photos of:

- Engineering
- Electrical panel manufacturing
- Office/team
- Industrial work

CAREER CARDS

For every opening, show:

Job Title

-  Location
-  Full-Time / Part-Time / Internship
-  Qualification
-  Required Skills
-  Experience
-  Application Deadline

Button:

DESIGN TARGET

The final website should feel:

Industrial + Modern + Premium + Clean + Trustworthy

Not:

Crowded + Colorful + Over-animated + Template-like
